

Criteria for Obstetric Fistula Care Centres

- Established treatment centre with a predefined minimum fistula case load.
- Human resource capabilities (e.g., trainers, administrative staff, other health professionals)
- Availability of education materials, meeting room, computer, capacities for distance learning/online-tutorials
- Capabilities for patient-level data collection, clinical audit, and monitoring & evaluation processes
- Adequate availability of trainer (s) at centre (e.g., surgeons, nurse trainers, and/or other professional skills)
- Adhere to a maximum number of pre-decided trainees at centre at one time (dependent on centre capabilities)
- Organization capabilities for pre-arrival logistics and administration (e.g., visas, accommodation), trainee induction, organization of work/training schedules, programme monitoring and evaluation, and quality assurance
