Posted 4 times in Ethiopia, West Wolega as consultant and medical expert for the organisation Maternity Foundation, working with Integrated Maternal Health Projects (maternal morbidity and mortality, family planning, women empowerment, mobile health, Safe Delivery app).

**My visions for FIGO are:**

- that FIGO should stay a strong performer on the global stage. I believe that reducing disparities in healthcare and advancing science, education and capacity building will improve the practice of obstetrics and gynaecology for the benefit of all women
- that FIGO should stay focused on the highest standards in reproductive and sexual healthcare for the benefit of all women. I believe that all women of the world have the right to achieve the highest possible standards of physical, mental, reproductive and sexual health and wellbeing
- that FIGO is an open, accessible, transparent and beneficial organization for all obstetricians and gynaecologist of the world. I believe that multilateral advocacy and an open and including policy is the strongest pavement of the road to these goals
